```

Only a very small number of employees among the lower grades of officials belong to the P.P.R. For this reason, the whole firm is virulently attacked by the Party, the Trade Unions and the Press and difficulties are put in the way of its work by other government offices. It is not popular with the Government and is attacked during meetings of the KRN (National Council) and various commissions. Government elements are doing their best to credit the firm as a tool of Mikolajczyk's. In July 1946, the total number of employees was 26,500 persons, including some 6,000 tractor drivers and approximately 6,000 fitters, plus unskilled auxiliary personnel and the administrative staff.

There are approximately 3,000 trucks and 2,000 passenger cars undergoing repairs and overhaul. Every tractor driver is liable to enrollment in the Motorized Arm after a short period of training. The firm also possesses a considerable stock of lubricants and many fuel depots. At present its tractors and machines are engaged on agricultural tasks such as sowing in the spring and autumn, harvesting in the summer and transport in the winter. Last spring nearly one million hectares of land were ploughed by this firm, mostly in the newly recovered territories in the West.

A tractor driver ploughs an average of 3 to $4\frac{1}{2}$ hectares of land a day for an average consumption of 20-25 kg. of heavy oil per hectare. There have been individual cases of drivers ploughing up ten hectares of land daily with _______ tractors, working from morning till night.

50X1-HUM

The peasants distrust the Company as they consider its activities the first step towards the introduction of a system of kolkhozes and collective farming. They did, however, avail themselves during the spring and summer of the facilities offered and gladly rented the tractors, as the ploughing of a hectare cost them 500 zlotys, plus the driver's board, while to plough the same area by horse-drawn ploughs cost approximately 2,000 zlotys. Tractors are used mostly on state owned properties and abandoned landed estates.
